- Total Submissions: 852 (89 solves / 763 fails)
- Overall Solve Rate: 10.4%
- Winning Team: HZ with 3,800 points

2. Competition Analytics

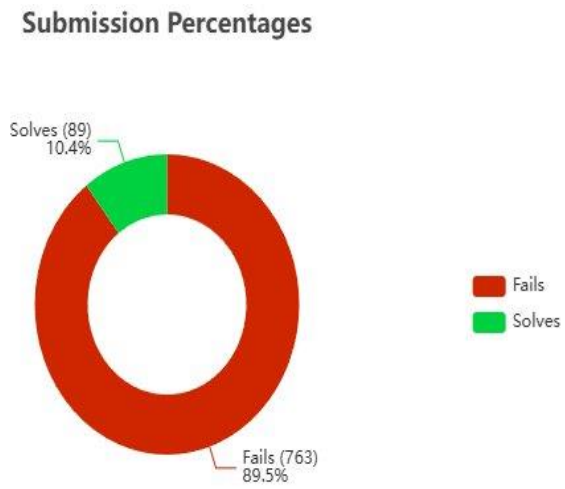

2.1 Score Distribution

The score distribution chart below shows how teams were distributed across score brackets during the competition.

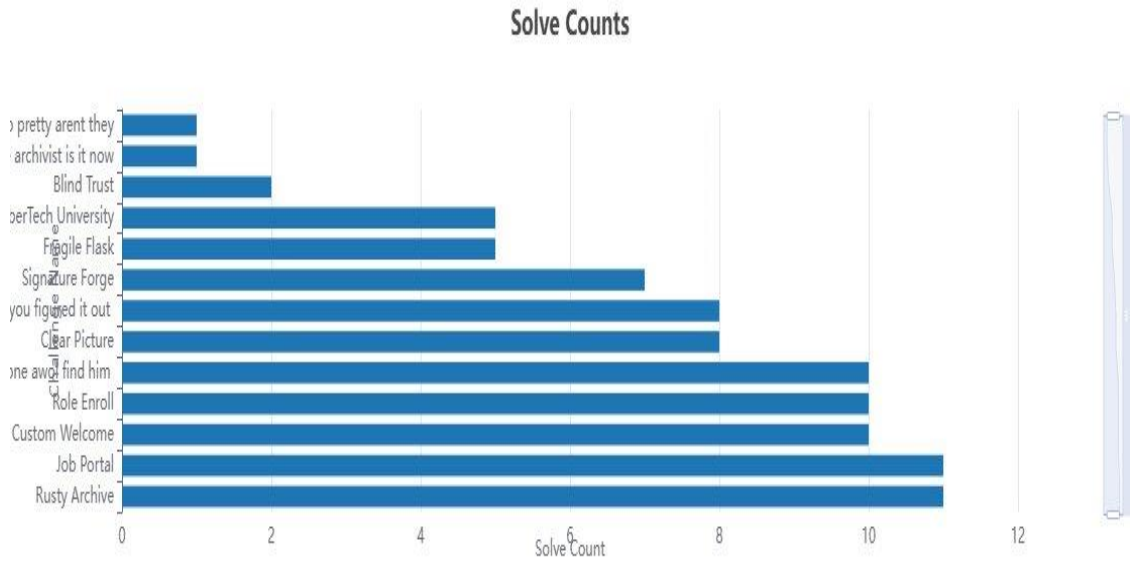

2.2 Submission Percentages

Of all 852 total submissions, only 10.4% (89) resulted in successful flag captures, while 89.5% (763) were failed attempts.

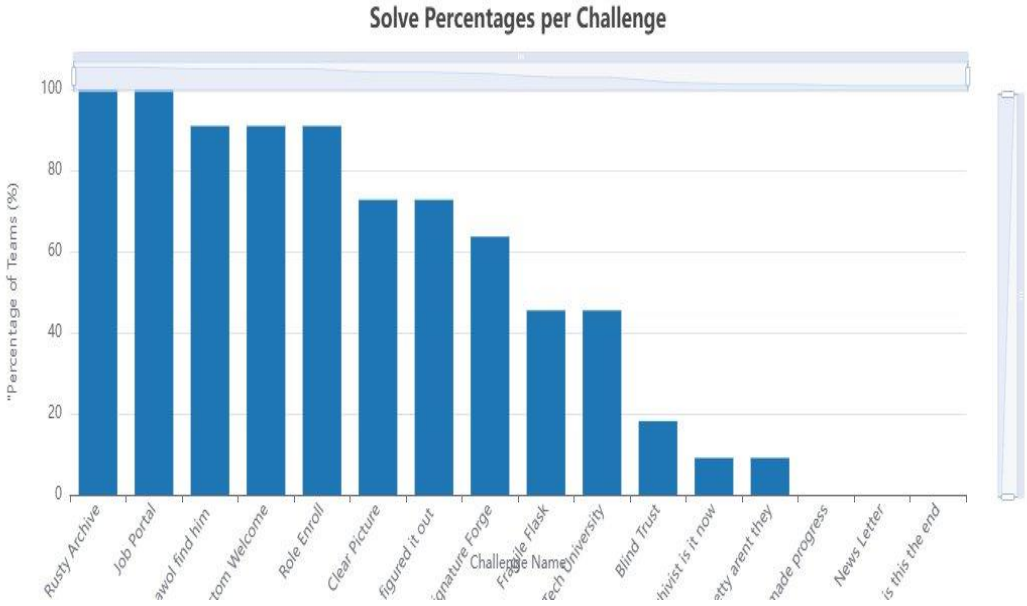

2.3 Solve Counts per Challenge

The chart below shows how many teams solved each challenge. Challenges like Rusty Archive and Job Portal were the most widely solved, while several challenges remained unsolved or near unsolved.

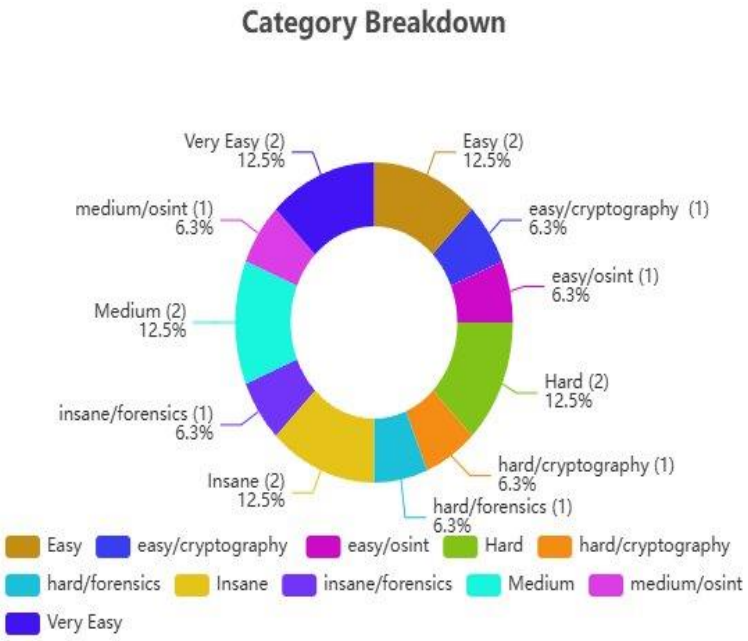

2.4 Solve Percentages per Challenge

Rusty Archive and Job Portal achieved 100% solve rates, while some challenges such as Newsletter and ‘is this the end’ saw zero solves across all teams.

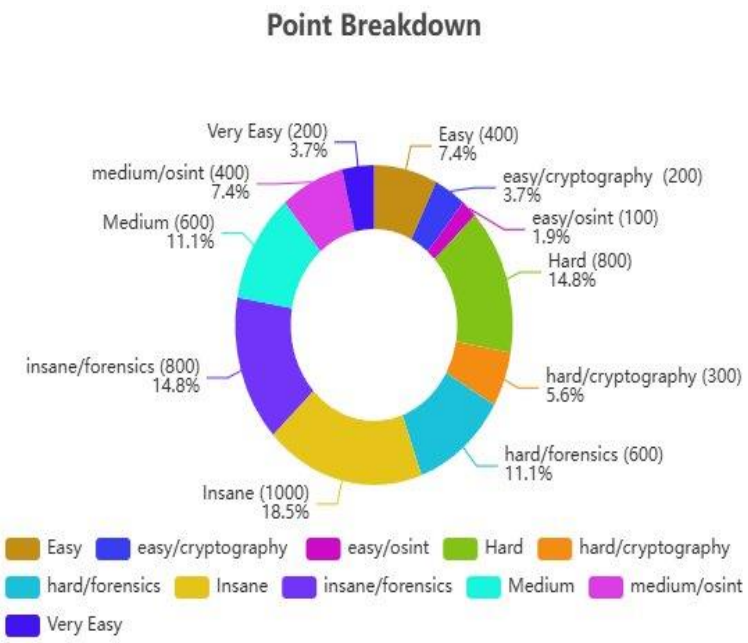

2.5 Category Breakdown

Challenges were distributed across multiple categories and difficulty levels. The competition featured 16 challenges ranging from Very Easy to Insane difficulty, with categories including forensics, cryptography, OSINT, and general web/binary challenges.

2.6 Point Breakdown

The total point pool was distributed across difficulty tiers. Insane challenges (1,000 pts) represented the highest single category, followed by Hard and insane/forensics challenges at 800 pts each.
